01 Place and terrain

Everglades lies in southern Florida, combining marshes, waterways and coastal areas. The pin is an approximate area marker, not a launch site or trailhead.

02 Visit equipment

Carry drinking water, sun protection and insect repellent. For paddling, match the route and boat equipment to your experience with local advice; a land trail is a different outing.

03 Clothing and footwear

Long sleeves and trousers help reduce mosquito exposure. Choose clothing for your activity and humid heat, while allowing for cool fronts in the dry season.

04 Access and transport

The main entrances are not connected inside the park; choose your entrance and arrange return transport. Homestead trolley service is seasonal; do not rely on an on-demand return ride.

05 Seasons and conditions

The wet season brings humid heat, storms and more mosquitoes. The dry season is usually milder but can have cold fronts; check alerts and post-storm closures.

06 Nature and identification limits

Anhinga Trail offers possible alligator and waterbird sightings, never guaranteed. Some plants irritate on contact; this summary cannot identify plants or justify approaching wildlife.

07 Important precautions

Do not feed or touch wildlife; supervise children near water. Give animals more room if their behaviour changes; share your route and change plans for extreme heat or storm warnings.

08 Activities and an easier option

Begin with the self-guided Anhinga Trail at Royal Palm; the park lists wheelchair access, subject to current conditions. For paddling, confirm the route, water levels, guide availability and any overnight permit.

Wildlife & plants

American alligator

[Information linked to regional sources](#)

This native reptile excavates water-holding holes that shelter other wildlife during dry periods. This is not an identification key separating alligators from crocodiles; observe from the trail.

Never approach, feed or touch. Follow posted distance guidance and move farther away if it hisses or changes behaviour; a barrier or distance figure does not guarantee safety.

Travel companions

A buddy-planning recommendation, not a safety guarantee. Remote or technical routes need group planning with a local expert. Avoid going alone.

Before you leave

Choose your route and turn-back point; check entry permissions and closures.

Check the forecast and save an offline map.

Review clothing, water, food and communication with your companions.

Agree a return time and alternative plan, and share them with a trusted contact.

Educational terrain examples, not a complete inventory or verified species list for these coordinates. Do not eat plants or animals based on this guide.
